<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	09/808,750	VO, HUY THANH
	<b>Examiner</b>	<b>Art Unit</b>
	Son L. Mai	2827

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 18 January 2005.
- 2a) This action is **FINAL**.      2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-41 and 45-54 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-41 and 45-54 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

1. The amendment filed 01-18-05 has been entered. Accordingly claims 1-41 and 45-54 are pending.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 8-14, 15-18, 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Cowles (U.S. Patent 5,940,315).

Regarding claim 1, Cowles discloses a memory array (figure 2A), comprising: a number of memory cells (not shown) having a first source/drain region and a second source/drain region and a gate region; a number of source lines (not shown) coupled to the first source/drain region of at least one memory cell; a number of bit lines (not shown) coupled to the second source/drain region of at least one a number of wordlines (30-33) coupled to the gate region of at least one memory cell; a strapping line (112) of lower resistance than the wordlines coupled to a single continuous wordline (31) in a single array (memory bank 100) wherein the strapping line bypasses only a portion in a middle region between a first and second end of the single continuous wordline, and wherein the strapping line is spaced apart from adjacent conductive structures by a distance greater than a wordline pitch (figure 2B shows that distance between strapping lines 112 and 113 is greater than a wordline pitch between wordlines 31 and 32); and

wherein adjacent strapping lines (110 and 112) bypass different portions of adjacent wordlines within the single array; and at least two channels (at node 150 in figure 2A) connecting the strapping line to a first and second end of the portion of the single wordline.

Regarding claim 2, Cowles also teaches that the strapping line comprises metal (column 4, first paragraph).

Regarding claim 3, Cowles also teaches the strapping line metal comprises a refractory metal (column 4, first paragraph).

Regarding claim 4, Cowles teaches that the portion of the wordline bypassed by the strapping line comprises a first half of the memory cells coupled to the wordline (two middle memory arrays in figure 2A are considered as a first half of the memory cells).

Regarding claims 8-14, 15-18, 26-29, since the claims recite similar limitations as in claims 1-4, they are rejected on the same ground.

4. Claims 5-7, 19-25, 30-36, 37-41, 45-48, and 49-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Cowles (U.S. Patent 5,940,315).

Regarding claim 5, Cowles discloses a memory array (figures 2A, 2B) comprising: a number of memory cells (not shown) having a first source/drain region and a second source/drain region and a gate region; a number of source lines (not shown) coupled to the first source/drain region of at least one memory cell; a number of bit lines (not shown) coupled to the second source/drain region of at least one memory cell; a number of wordlines (30-33 in figure 2A) coupled to the gate region of at least one memory cell; a plurality of separate strapping lines (110-113) of lower resistance

than the wordlines coupled to at least one of the number of wordlines (wordline 31) in a single array (memory block 100) wherein the strapping lines bypass a plurality of separate portions of a single continuous wordline (column 3, lines 57-60), and wherein adjacent strapping lines (110, 112) bypass different portions of adjacent wordlines within the single array; and a plurality of channels (e.g., node 150 in figure 2A) connecting the plurality of strapping layers to the wordline.

Regarding claim 6, Cowles also teaches that the strapping line comprises metal (column 4, first paragraph).

Regarding claim 7, Cowles also teaches the strapping line metal comprises a refractory metal (column 4, first paragraph).

Regarding claims 19-25, 30-36, 37-41, 45-48 and 49-54, since the claims recite similar limitations as in claims 5-7, they are rejected on the same ground.

#### ***Response to Arguments***

5. Applicant's arguments filed 01-18-05 have been fully considered but they are not persuasive. The added limitation "adjacent strapping lines bypass different portions of adjacent wordlines within the single array" to independent claims 1, 5, 8, 15, 19, 26, 30, 37, 45, and 49 is anticipated by Cowles as pointing out in the foregoing paragraphs. Thus, all the claims are unpatentable under 35 U.S.C. 102(b).

#### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the

Art Unit: 2827

event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son L. Mai whose telephone number is 571-272-1786. The examiner can normally be reached on 8am to 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoai Ho can be reached on 571-272-1777. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
